Compact Signal Calibrator **CSC201**

JOFRA CSC201 is a compact temperature signal calibrator. Calibrate or measure thermocouples and RTD's. A large number of predefined sensor types are available. Easy-to-use, intuitive user interface, with comprehensive ramp and step functions. All functions are displayed on the large ClearBrite™ display. The high accuracy of CSC201 has not been achieved on account of fragile measurement or source circuitry, CSC201 has fuseless protection – this might save you a calibrator or lower your cost of ownership.

JOFRA APM pressure modules

When used with pressure modules the CSC201 becomes a pressure calibrator / indicator. The APM series of pressure modules by JOFRA are compatible with the AMC900, AMC910, ASC300, ASC301, or HPC500, HPC502 and HPC600 calibrators. The APM external pressure modules include more than 24 models available with gauge, absolute, differential, and vacuum pressure references and in metric and imperial engineering units. The modules are engineered for in-plant, field or laboratory use. They are ready-to-use with immediate recognition of the module once it is plugged into the calibrator.
